What does it cost to be cool?

Port-A-Cool® model resource use

PORT-A-COOL® MODEL	COST ELECTRIC & WATER (1 HOUR)
Cyclone 2000	\$0.04
Cyclone 3000	\$0.08
16" Three VT Model	\$0.08
16" Three Speed HD Model	\$0.08
JetStream 1600	\$0.08
JetStream 2400	\$0.20
24" Variable Speed	\$0.20
36" One Speed Model	\$0.27
36" Three Speed Model	\$0.26
36" Variable Speed	\$0.26
48" Two Speed Model	\$0.34

Data compiled using standard lab conditions of temperature and humidity. Performance may vary depending on location.

What is evaporative cooling?

Remember the chill of wind hitting your skin after swimming on a hot day? That's natural evaporative cooling.

How do these units work?

Port-A-Cool® portable evaporative cooling units employ the same natural cooling process, using forced air over water-soaked evaporative cooling pads to reduce temperatures up to 30 degrees F.

Why choose Port-A-Cool® units?

- Cools anywhere standard air conditioning is ineffective or cost prohibitive
- Hourly cost of just 4-34¢ depending on the unit size
- Cools instead of recirculating stale, hot air
- Cools up to 4,000 square feet with the largest unit, or choose a smaller model for tight spaces
- Cools where you need it
- Cools without any chemicals
- Cools economically with efficient, effective resource use

ALL PORT-A-COOL® UNITS FEATURE:

- Rust-proof and leak-proof housing
- Easy rolling casters for spot cooling
- Efficient and economical operation
- Cooling for 500 to 4,000 sq. ft. depending on model
